companies may need to be defined now that one concessionaire seems likely to create revenue; problems may also arise if, as a result of oil developments, it is planted with a population that will need to be endowed with public services and, no doubt, with a system of taxation.

BAHRAIN

The Bahrain Archipelago is a group of islands in the Gulf of Bahrain, which is bounded on the east by the Qatar Peninsula and on the west by the mainland coast of al-Hasa. Its total area is 213 square miles. The principal island—Bahrain itself—is about thirty miles long and ten miles wide. It is low-lying and its northern end is well watered by fresh water springs and produces good date crops. Citrus fruit and lucerne are also grown. The oilfields lie round the rocky cluster of hills known as Jebel Dukhan (Hill of Smoke), which is in the barren centre of the island.

To the north-east of Bahrain Island, and joined to it by a causeway and motor road, is the low, sandy island of Muharraq, and between the two islands is a good deep-water harbour (Khor Kaliya). It is used as a small British naval base; an American admiral also flies his flag there. Nearby there is a second, but shallow harbour (Bahrain harbour), which faces north and is usefully equipped. The natural aerodrome on Muharraq Island has been developed into the largest commercial airfield in the Persian Gulf and now serves the airliners of all nations. It is also used by the RAF, and the whine of jet aircraft is a commonplace. The south end of the island of Bahrain is low-lying and sandy. The climate, though oppressive in summer owing to the prevalent heat and damp of the western shores of the Persian Gulf, is more humid and less windy than that of Kuwait. The population of the Archipelago was 109,650 when a census was taken in 1950.[1]

The capital and the seat of government is the port of Manama.[2] It is generally referred to as Bahrain, and is situated between the two harbours. It has a population of 39,648, which includes many rich Arab, Persian, and Indian merchants, as well as some 300 Europeans and Americans. The second town, Muharraq, on Muharraq Island, has a population of 24,566 which is purely Arab.

The British Political Agency is in Manama town, which also boasts an electricity station, a wireless station, post offices, hospitals, clubs, public gardens, and up-to-date schools. The town is well supplied with good motor roads, and there are

[1] 1952 estimate, 115,000. [2] Population: 1950, 39,648; 1952 (estimate), 45,000.

nama, Muharraq and Hedd and the 3 villages of East and West Rafaa and Sakhir was less than 1 per cent.

Social Economy

Prior to the opening of the Bahrain oil fields, the economy of the islands was based upon pearl fishing and the transshipment of goods between Iran, India and other countries and the neighboring Arabian ports. The waters of the Persian Gulf contain famous pearl fishing banks, and, since ancient times, Bahrain has been recognized as the traditional center of the industry. It constituted the principal source of wealth for centuries, but it reached a low level in the 1920s, due in part to the competition of Japanese cultured pearls in the world markets. Early records are nonexistent, but the former Bahrain pearl fleets probably consisted of 600 to 1,000 vessels. The number has declined progressively: only 83 departed for the banks in 1950. In that year, about 2,000 Bahrainis were engaged in pearl fishing during the season from mid-April to October, undoubtedly a fraction of the total employed when the demand for pearls was at its height.

In previous decades, dhow building also was one of the major industries of Bahrain, but its decline has paralleled that of the pearl fisheries. Nine boats were constructed in 1949, as against 100 reported in 1928-29.

Today, oil is the foundation of Bahrain's prosperity. The royalties derived from the industry not only have bolstered the declining resources of the government, but have made possible the expansion of public works and social services. Operations are conducted by the Bahrain Petroleum Company, Ltd., which holds long-term concessions from the Sheikh of Bahrain for the development of the petroleum resources of the islands. Oil was discovered in the Jabal ad Dukhan region, near the center of Bahrain Island, in 1932, and production started in 1934. The proven reserves of this field are estimated in the neighborhood of 200 million barrels. The company also operates a
